ISO 13485:2013 certification is a quality management qualification system specific for health care products. It guarantees that the health product is manufactured under GRP rules, and that its use is safe, perfectly suitable for the intended use and complies with the legal requirements.

ISO 9001:2008 is an international certification, elaborated by the International Organization for Standardization ISO. Being recognized worldwide as the authority on quality management, confirms that the enterprise works according to the Quality Management Standards.

ISO certificate guarantees the quality of the products and services for the consumer, an additional guarantee of reliability and professional competence.

The benefits of having ISO 9001/13485:

- Quality Standard of the technological/manufacturing processes
- High confidentiality due to universal acceptance of the ISO standards
- Well defined and documented procedures improve the consistency of output
- Quality is constantly and strictly measured
- Procedures ensure corrective action is taken whenever defects occur
- Claims decreasing
- Defects are caught earlier and are corrected at a lower cost
- Business evolution due to customer satisfaction

CE Marking on a product is a certification, emitted by an European notified body, that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation, called Product Directives.

- CE Marking on a product indicates to governmental officials that the product may be legally placed on the market in their country
- CE Marking on a product ensures the free movement of the product within the EFTA & European Union (EU) single market (total 28 countries)
- CE Marking on a product permits the withdrawal of the non-conforming products by customs and enforcement/vigilance authorities
Original formulations
RRS® line: the quintessence of scientific knowledge and technologic progress.
The original RRS® formulas, designed in our own R&D laboratory, are based on the purest and most effective ingredients, with scientific evidences for superficial and deep skin injections in case of skin rejuvenation, with synergetic actions on several problems.

Non cross-linked HA* from biotechnological non animal origin
Hyaluronic Acid provides:
• Antioxidant effect
• Cells migrations stimulation
• Turnover stimulation
• Matrix reorganization

The specific biorevitalization complex helps to get the following actions:
• Anti ageing
• Dermal filling & biorevitalizing
• Hair growth stimulation
• Anti cellulite
• Anti striae
• Whitening effect

Applicable tools for aesthetic medicine practitioners, dermatologists, plastic surgery, etc.
Can be injected during any season
Various indications for Face and Body
Clinically approved protocols
Used for male & female patients
No age limitation
Reliable & quick response after treatment
Stable results
Low risk of side effects
Compatible with other products & techniques
Hyaluronic Acid is from biotechnological, non animal origin

**No studies are available for use during pregnancy or minors under 18.

Class III medical device

RRS® HYALIFT® 35
Non cross linked Hyaluronic Acid* 35 mg
It is a resorbable non cross linked hyaluronic acid for filling superficial dermis together with a dermal biorevitalization and hydration effect.

Recomended for patients 25-35** years old

RRS® HYALIFT® 75
Non cross linked Hyaluronic Acid* 75 mg
It is a more concentrated resorbable non cross linked hyaluronic acid for filling superficial wrinkles together with a dermal biorevitalization and hydration effect.

Recomended for patients 35-45** years old

RRS® HYALIFT® 75 PROACTIVE
Non cross linked Hyaluronic Acid* 75 mg + biorevitalization complex
It is a more concentrated resorbable non cross linked hyaluronic acid for filling superficial wrinkles together with a dermal biorevitalization and hydration effect, assisted by a biorevitalization solution containing i.e. resveratrol and amino acids.

Recomended for patients 45-55** years old

For Face & Body

Hydrobalance & Biorevitalization
Anti Aging injectable treatments
Superficial Wrinkles
Skin Flacidity

box of 2 vials / 6 vials / 12 vials
containing 5 ml (0.175 F.oz.)
Before the treatment
the physician should inform the patient about:
· indications and effects
· possibilities of the side effects (pain, redness, ecchymosis, stinging sensations and swelling, local inflammation, usually disappearing in 24 hours)
· check allergy test
Sensitive skins may benefit from application of an anaesthetic cream prior to the treatment. We recommend to have a consent signed by the patient.

After the treatment
Avoid: extreme temperatures, Saunas - Hammam; direct exposure to sun or UV. From next day make-up can be used.

Contraindication
Allergy to any of the ingredients. Patients presenting any skin alteration, skin disease, infections or sequelae of streptococcal infections. Patients taking immunosuppressants, undergoing cortical therapy, with autoimmune disease history, patients with uncompensated diabetes, acute joint rheumatics, repetitive angina, and endocarditis.

*No studies are available for use during pregnancy and breastfeeding or in case of treatment on children or minors under 18.

RRS® HYALIFT® 35:
HA, non-cross-linked 35 mg

RRS® HYALIFT® 75:
HA, non-cross-linked 75 mg

RRS® HYALIFT® 75 PROACTIVE:
HA, non-cross-linked 75 mg
Amino acids: Glutamic Acid, Alanine, Arginine Aspartate, Phenylalanine, Glycine, Histidine, Isoleucine, Leucine, Levoglutamide, Lysine, Proline, Serine, Taurine, Threonine, Tyrosine, Valine

RRS® HA Hyalift® 35, RRS® HA Hyalift® 75 and RRS® HA Hyalift® 75 Proactive must be used under appropriate aseptic conditions in an authorized clinic on healthy, disinfected skin.

Area: face & neck / decolletage / hands
Average volume/session: 5mL / area
Type of injection: micro dermal papule
Frequency: 1 session / 1 week (1 protocol = 6 sessions average)
Recommended number of sessions: repeat protocol 1-3 times a year
Combination with other aesthetic treatments:
· Botulinum toxin: two weeks before/after RRS® injection
· Microneedling device: RRS® can be injected immediately before
· Peeling: time distance can be different, RRS® injection can be done immediately before usual peelings
· RRS® can enhance results of other medical treatments or devices
· Home care: AD Daily care anti-age

RRS® HYALIFT® 35, RRS® HYALIFT® 75 and RRS® HYALIFT® 75 Proactive must be used under appropriate aseptic conditions in an authorized clinic on healthy, disinfected skin.

RRS® HA INJECTABLE

Dermal implant + biorevitalization
Anti-Aging injectable treatments
Superficial fine Wrinkles
Skin Flaccidity & Dehydratation

RRS® HA INJECTABLE is specially indicated for filling the superficial dermis, associated to a dermal anti-ageing biorevitalization. Hyaluronic acid, together with the biorevitalization anti-ageing solution supplies the skin with exceptional hydration and very remarkable effect.

RRS® HA INJECTABLE is therefore a medical device for skin anti-age regeneration, stimulation on mature skin, tired atonic skin, with fine wrinkles. It is particularly useful on smoker’s skins, on mature and devitalized skins or for patients stressed or living in a polluted area.

No limit of age**

Class III medical device

*Hyaluronic Acid is from biotechnological, non animal origin
**No studies are available for use during pregnancy or minors under 18.

For Face & Body
Before the treatment the physician should inform the patient about:
- indications and effects
- possibilities of the side effects (pain, redness, ecchymosis, stinging sensations and swelling, local inflammation, usually disappearing in 24 hours)
- check allergy test
Sensitive skins may benefit from application of an anaesthetic cream prior to the treatment.
We recommend to have a consent signed by the patient.

After the treatment
Avoid: extreme temperatures, Saunas - Hammam; direct exposure to sun or UV.
From next day make-up can be used.

Contraindications
Allergy to any of the ingredients. Patients presenting any skin alteration, skin disease, infections or sequelae of streptococcal infections. Patients taking immunosuppressants, undergoing cortical therapy, with autoimmune disease history, patients with uncompensated diabetes, acute joint rheumatics, repetitive angina, and endocarditis.
*No studies are available for use during pregnancy and breastfeeding or in case of treatment on children or minors under 18.

HA, non-cross-linked associated to:
- Fatty acids: Oleic acid, Linoleic acid, Linolenic acid.
- Coenzymes: NAD, NADP
- Antioxidants: Ascorbic Acid, Phylic Acid, Lipic Acid, Taurine, Theanine, Chlorogenic Acid, Rosmarinic Acid, Tocopherol, Ballic Acid, Ferulic Acid, Caffeic Acid, etc.
- Polyphenols: Quercetine, Hesperidine, Resveratrol, Catechine, Epicatechine, Procyanidin, Pycnogenol, Rosmarinic Acid.
- Trace elements: Ca, Cr, Cu, Zn, Fe, K, Mg, Mn, Na, P, Co, Se, Si.
- Terpenes: Lilalool, Limonene, etc.

RRS® HA Injectable must be used under appropriate aseptic conditions in an authorized clinic on healthy, disinfected skin.

Area: face / neck & decolletage
Average volume / session: 5 ml / area
Type of injection: micro dermal papule
Frequency: 1 session / week (1 protocol = 4-6 sessions average)
Recommended number of sessions: repeat protocol 1-3 times a year
Combination with other aesthetic treatments:
- Botulinum toxin: two weeks before RRS® injection
- Filler: time is not important, can be injected in one treatment
- Peeling: RRS® can be injected immediately before usual peelings
- Microneedling device: RRS® can be injected immediately before
- Lasers: RRS® can be injected immediately before
- Excellderm® Pro after RRS® injections: synergetic action
**Hyaluronic Acid is from biotechnological, non animal origin**

**No studies are available for use during pregnancy or minors under 18.**

**RRS® HA SKIN RELAX WITH BONTA 568®**

Skin anti-age treatment on mature skin.
Dermal filling effect (Hyaluronic Acid)
Dermal relaxing effect [BoNtA 568®]

Anti aging meso treatments - Skin relax

No limit of age**

Class III medical device

Box of 2 vials / 6 vials / 12 vials containing 3 ml (0,10 Fl.oz.)

BIOREVITALIZATION + DERMAL RELAXING EFFECT
Intradermal implant containing 3 mg of non cross linked resorbable Hyaluronic Acid* associated to oligopeptides

Facial expresions areas & decolletage

*Hyaluronic Acid is from biotechnological, non animal origin
**No studies are available for use during pregnancy or minors under 18.
RRS® HA SKIN RELAX WITH BONTA 568®

Before the treatment

- indications and effects
- possibilities of the side effects (pain, redness, ecchymosis, stinging sensations and swelling, local inflammation, usually disappearing in 24 hours)

Sensitive skins may benefit from application of an anaesthetic cream prior to the treatment. We recommend to have a consent signed by the patient.

**After the treatment**

Avoid: extreme temperatures, Saunas - Hammam; direct exposure to sun or UV. From next day make-up can be used.

**Contraindications**

Allergy to any of the ingredients. Patients presenting any skin alteration, skin disease, infections or sequelae of streptococcal infections. Patients taking immunosuppressants, undergoing cortical therapy, with autoimmune disease history, patients with uncompensated diabetes, acute joint rheumatics, repetitive angina, and endocarditis.

*No studies are available for use during pregnancy and breastfeeding or in case of treatment on children or minors under 18.

**HA, non-cross-linked associated to:**
- **Antioxidants:** Vit C, Triferulic Acid, Iribi Acid, Hederacolchiside E and F, etc.
- **Lipolytics:** Fucoxanthin, Caffeine.
- **Flavonoids:** Cinaroside, Cinaratrioside, Quercetine, Kaempferol, Troxerutin, Rutin, Hesperidin.
- **Trace elements:** I, K, Br, CI, Ca, Fe, Si, Mg.
- **Vitamins:** Vitamin C, Vitamin A, Vitamin B2.
- **Saponins:** Ruscogenin, Neoruscogenin, α-hederin, Hederaasaponin D, Asiaticoside, etc.
- **Triterpenes:** Asiatic acid, Madecassic acid, Succinic acid.
- **Amino acid:** L-Carnitine.
- **AHAs:** Malic Acid, Lactic Acid.
- **Polyphenols:** Chlorogenic acid, Chlorogluconol.

**RRS® HA Cellutrix**

RRS® HA Cellutrix must be used under appropriate aseptic conditions in an authorized clinic on healthy, disinfected skin.

**Area:** buttocks / back of the thighs
**Average volume/session:** 10 ml / area [maximum 30 ml]
**Type of injection:** micro dermal papule
**Frequency:** 1 session / week [1 protocol = 4-6 sessions average]
**Recommended number of sessions:** repeat protocol 1-3 times a year

Combination with other aesthetic treatments:
- RRS® can enhance results of other anti-cellulite medical treatments
- Excellderm Pro after RRS® injections: synergetic action

**More information in RRS-Inject.com/Medinet**
### RRS® SILISORG

**1000 mg Organic Silicium and Resveratrol**  
It is mainly used as a product for skin and subcutaneous tissues biorevitalization.

**No limit of age**

- Collagen elastine booster,  
- Dermatoprotector  
- Aesthetic injectable treatments

**For Face & Body**

*Hyaluronic Acid is from biotechnological, non animal origin  
**No studies are available for use during pregnancy or minors under 18.

Box of 2 amp/12 amp/24 amp containing 5 ml (0.175 Fl.oz.)

### RRS® HA SILISORG

**250 mg Organic Silicium + 10 mg Hyaluronic Acid and Resveratrol**  
It is mainly used as a product with a dermal biorevitalization and hydration effect thanks to the combined Hyaluronic Acid.

Recommended for patients 25-45** years old

- Aesthetic injectable treatments  
- Soft skin lifting  
- Collagen elastine booster

**For Face & Body**

### RRS® SILISORG TENSOR

**125 mg Organic Silicium + 5 mg DMAE for a better tensing effect**  
It is used as a dermal biorevitalizing and tensing filler thanks to the DMAE.

Recommended for patients 45-65** years old

- Aesthetic injectable treatments  
- Soft skin lifting & Skin flaccidity  
- Collagen elastine booster

**For Face & Body**

Class III medical device
Before the treatment the physician should inform the patient about:
- indications and effects
- possibilities of the side effects (pain, redness, ecchymosis, stinging sensations and swelling, local inflammation, usually disappearing in 24 hours)
- check allergy test
Sensitive skins may benefit from application of an anaesthetic cream prior to the treatment. We recommend to have a consent signed by the patient.

After the treatment
Avoid: extreme temperatures, Saunas - Hammam; direct exposure to sun or UV. From next day make-up can be used.

Contraindications
Allergy to any of the ingredients. Patients presenting any skin alteration, skin disease, infections or sequelae of streptococcal infections. Patients taking immunosuppressants, undergoing cortical therapy, with autoimmune disease history, patients with uncompensated diabetes, acute joint rheumatics, repetitive angina, and endocarditis.
*No studies are available for use during pregnancy and breastfeeding or in case of treatment on children or minors under 18.

Organic Silicium associated to Resveratrol

**ANTIAGING BODY TREATMENT**

RRS® Silisorg must be used under appropriate aseptic conditions in an authorized clinic on healthy, disinfected skin.

**Area:** knee / leg / inside of thigh / ankle

**Average volume/session:** 5 ml / area

**Type of injection:** micro dermal papule

**Frequency:** 1 session / week (1 protocol = 4-6 sessions average)

**Recommended number of sessions:** repeat protocol 1-3 times a year

**Combination with other aesthetic treatments:**

- **Peeling:** time distance can be different, RRS® injection can be done immediately before usual peeling
- **Microneedling device:** RRS® can be injected immediately before
- **Excellderm® Pro after RRS® injections:** synergetic action

### XL HAIR®

**Strong hair stimulation**

*(Does not contain Minoxidil or 5-Alpha-Reductase inhibitors)*

The restructuring and moisturizing capacity of Hyaluronic Acid, supplies the skin with exceptional hydration and very remarkable biostimulation effect. Hyaluronic Acid is known for its power in restructuring the intercellular matrix, allowing more efficient natural exchanges between cells (from which hair roots cells) and matrix. XL HAIR® is therefore a product specially formulated for the hairy dermis (scalp but also pubis or eyebrows), since the biorevitalisation and carrier effects of Hyaluronic Acid (5 mg) are assisted by a specific bio revitalization solution for hair loss treatment.

No limit of age**

Class III medical device

[Box of 6 vials / 12 vials containing 3 ml (0.10 Fl.oz.)]

**SCALP DERMIS BIOSTIMULATION**

Hair energy & anti aging

Symptomatic hair loss - Different pattern of baldness

*Hyaluronic Acid is from biotechnological, non animal origin

**No studies are available for use during pregnancy or minors under 18.

HAIR RESTORATION

CLINICAL STUDY TO EVALUATE THE EFFICACY OF A COMBINED TREATMENT WITH XL HAIR® IN DIFFERENT BALDNESS PATTERNS

E Ranneva [Spain]; G Siquier [Netherlands]; Ph Deprez [Spain]; R Vergereau [France]. 2011-12-13

INTRODUCTION
Hair loss becomes one of the most frequent problems of both genders, which motivates the patients to visit the dermatologist. Male and female baldness patterns have statistical, clinical and diagnostic differences. The main treatments FDA approved for hair loss include corticosteroids, minoxidil and 5-alpha-reductase inhibitors. The surgical treatments for hair restoration are strip techniques, follicular unit extraction, scalp flap and scalp reduction. Each product or method have contraindications and side effects.

XL Hair® injectable class III medical device, Reparestim® Hair TD and AD Daily Care Hair are capillary regenerators which revitalize and strengthen capillary fibre via a greater contribution of essential nutrients for capillary growth and a stimulating action of hair growth factors.

MATERIAL AND METHODS
A multi-center, open label, non-comparative pilot study was performed in 47 patients (32 women and 15 men) who had medical visit due to hair loss. The average age of the patients was 34 years and the evolution period of the alopecia condition was 5 years. Efficacy was determined at the 3rd and 6th months. XL Hair® injections and/or Reparestim® Hair TD application with microneedling device AD Roll TD® repeated once a week on the area of hair loss or alopecia, total 8 sessions. Possible side effects were easily treated, as daily care AD Daily Care Hair spray has been applied directly on the scalp with light massage ensuring the product is well distributed over the problematic area. Application twice a day, 3 times a week, during 8-16 weeks. The regular treatment with injections of XL Hair® or microneedling with Reparestim® Hair TD combined with topical application of AD Daily Care Hair could stop active hair loss in 3 months and stimulate new hair growth in 6 months. The best efficacy was observed in case of symptomatic hair loss in the female pattern: after pregnancy, nursing period, stress, starvation. In the male pattern which is related to the androgenic alopecia, the result gives satisfaction, but further investigation will be necessary. The patient with androgenic alopecia received 12 treatments, once every two weeks. 60% of the patients were satisfied with result of the treatment after 12 weeks.

CONCLUSION
The results of the study indicate that injections of XL Hair® or Reparestim® Hair TD applied with microneedling device (AD Roll TD®) and combined with AD Daily Care Hair are efficient treatment for hair loss in different baldness patterns. The results indicate that mesotherapy injections of XL Hair®, or microneedling with Reparestim® Hair TD combined with AD Daily Care Hair induce the activation of the hair follicle which promotes an enlargement of the anagen phase and a shortening of the telogen phase, reversing the miniaturization of the hair follicles besides stop hair loss and promote new hair growth. The protocol of application and frequency of treatment have been adapted to the gender. To optimize obtained results, the application of AD Daily Care Hair cannot be less than 6 months.
RRS® RECOMMENDATION TABLES

RRS® products may be beneficial alone in all age groups with any skin type and color or in combination with non-surgical treatments.

Skin Tech Aesthetic Dermal

Combined Treatment for young patients

Indications:
- Reduce aspect of swollen eyes
- Smooth skin contour
- Enhance skin elasticity
- Skin Rejuvenating
- Anti-oxidant effect

Products:
- Analytic Dermal
  - BRUSH HA Skin Relax, deep microdermal peeling 0.3% / injection points 0.25mm
  - BRUSH HA Skin Relax 10% dermal peeling 0.6% / injection points 0.25mm

Special daily care: daily lactic acid 10%.

Protocol of application:
Step 1: For skin cleansing, use Cleanser pH 5.5 foam, then apply astringent solution gently.
Step 2: Inject 1 vial per BRUSH HA Skin Relax, deep microdermal peeling 0.3% / injection points 0.25mm.
Step 3: Inject 1 ampoule per BRUSH HA Skin Relax, deep microdermal peeling 0.6% / injection points 0.25mm.

Step 4: Apply Easy Physio Solution with cotton ball 2.5mg / treatment, let it dry. Maximum two treatments recommended.

Step 5: Apply a thin layer of one of the Skin Tech cream that best suits the patient’s problems and manage gently.

Step 6: Recommendation after the treatment:
- Do not apply serum cream you use with special Skin Tech Cleanser.
- To obtain the effect of the skin for the best possible results, we recommend the use of our Micellar cleanser. Use twice a day just before bed. The Micellar cleanser can be used in the morning and evening. Apply on face and neck.
- Use After-care serum cream.

Step 7: Recommended number of treatments:
1 treatment per week, 4 treatments average. Re-treatment sessions 2 times a year.

Recommended treatment price / Recommended cream price.

Combined Treatment for patients 45+

Indications:
- Reduce aspect of swollen eyes
- Enhance the appearance of wrinkles under the eyes
- Smooth skin contour
- Enhance skin elasticity
- Skin Rejuvenating
- Anti-oxidant effect

Products:
- Analytic Dermal
  - BRUSH HA Skin Relax, deep microdermal peeling 0.3% / injection points 0.25mm
  - BRUSH HA Skin Relax 10% dermal peeling 0.6% / injection points 0.25mm

Special daily care: facial lactic acid 10%.

Protocol of application:
Step 1: For skin cleansing, use Cleanser pH 5.5 foam.
Step 2: Inject 1 vial per BRUSH HA Skin Relax, deep microdermal peeling 0.3% / injection points 0.25mm.
Step 3: Inject 7 ampoules per BRUSH HA Skin Relax, deep microdermal peeling 0.6% / injection points 0.25mm.

Step 4: Apply Easy TGA (Medium) 12 needle. Re-treatment is possible up to 2 weeks after, perform special post-treatment care.

Step 5: Recommendation after the treatment:
- On the next day, please move on to our special Skin Tech Cleanser.
- To obtain the best effect of the skin for the best possible results, we recommend the use of our Micellar cleanser. Use twice a day just before bed. The Micellar cleanser can be used in the morning and evening.
- Use After-care serum cream.

Step 7: Recommended number of treatments:
1 treatment per week, 4 treatments average. Re-treatment sessions 2 times a year.

Recommended treatment price / Recommended cream price.
Main advantages

- **CE marked (Class III injectable):** official injectable possibility, official advertising possibility, official clinical study possibility
- **Quality of raw material** (ISO certifications) and **manufacturing process** (ISO)
- **Quality of production** (ISO certifications)
- **Originally formulated**
- **Original technological process**
- **Paraben & colorant free:** complies with the actual safety requirements
- **Competitively priced**
- **RRS® products** low commercial investment and very high profits
- **RRS® products** have good competitive situation
The number of vials/ampoules in the box (adapted to the recommendations to use/number of treatments, commercial advantages to have (5+1 or 10+2)

- Single use vial: no risk of cross-injections
- Volume adapted to the indication: 1 vial = 1 treatment
- Possibility to mix different RRS® products in the same syringe
- Instruction sheet in different languages
- No need of any special devices for application (only syringe and needles)
- No need special storage conditions
A GRACEFUL JUMP BEYOND MESOTHERAPY
CE Class III Injectable products
New mesotherapy and biorevitalization

RRS® products are based on hyaluronic acid and organic silicium, associated with specific biorevitalization solutions. Enjoy immediately RRS® results!

Best solutions for your face
RRS® products are versatile. Most of them are done for fighting ageing signs, such as skin flaccidity or fragility, superficial wrinkles. They allow normalizing the dermal hydro balance and help repairing sun damages or tired skin.

RRS® HA Injectable represents the adequate choice in anti-aging mesotherapy. The results after infections are usually appearing very quickly. A better skin tension can be seen immediately after the very first session. 4 to 6 sessions can be necessary for a complete restoration of your skin. Repeat injections every week or every other week.

Best solutions for your body
For skin flaccidity: RRS® HA Tensor Lift
For stretch marks: RRS® HA Strimatrix
For cellulite: RRS® HA Cellutrix

Special formulations
For control of pigmentation: RRS® HA Whitening
For eyes contour enhancement: RRS® HA Eyes
